disciplinary projects

- Developing mechanical design projects (or components of projects), design basis, scopes of work, specifications, cost estimation, proposals, design reports, etc.
- Embracing a strong digital work environment and delivery culture

What you'll need to succeed

Your previous experience in a similar role within this area will lead to your success, as will:

- Demonstrated experience in delivering technical design projects for mechanical building services.
- Sound knowledge of mechanical (HVAC) and experience in cooling and heating load estimations will be highly regarded
- Strong communication skills with internal and external stakeholders
- Demonstrated self-management; ability to work autonomously and take ownership of outcomes
- Strong technical and client management skills, with a determination to derive innovative design solutions

What you'll get in return

In return for your dedication and hard work you'll be rewarded with:

- Employee reward and recognition program
- A creative and innovative environment with modern tools and technology
- Excellent training, support and global career opportunities

What you need to do now
